

30th December 2025

To,
Whomsoever It May Concern,

Subject: Declaration of End-of-Life (EOL) for Noccarc H210 HFNC Model

Dear Sir/Ma'am,

This is to formally declare that the **HFNC H210 Model manufactured by Noccarc Robotics Pvt. Ltd.** has reached its End-of-Life (EOL) status.

The HFNC H210 system has been in service for a considerable duration. The last lots were manufactured in 2021 and has now approached the end of its recommended operational lifecycle. Based on our technical evaluation and product lifecycle guidelines, continued usage of this equipment may not ensure optimal performance, reliability, and meet specified delivery parameters.

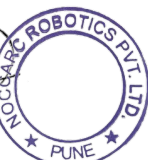

Furthermore, due to ongoing technological advancements and product upgrades, certain components and spare parts associated with the HFNC H210 model are being phased out. As a result, comprehensive service support, maintenance, and availability of critical spares may be limited or discontinued going forward.

In light of the above, we strongly recommend the planned decommissioning of the **HFNC H210 unit(s)** and replacement with upgraded models to ensure uninterrupted clinical operations and adherence to current safety and performance standards.

This declaration is being issued upon request and for official record purposes.

We request you to kindly acknowledge the receipt of this declaration. For any further assistance regarding replacement, upgrade options, or technical support, please feel free to contact us.

Warm regards,

Nikhil Kurele
Chief Executive Officer
Noccarc Robotics Private Limited
